

Brochure

Using the text contained in the cruiseFAQS.pdf file, create a 4-page brochure in Adobe InDesign. Each page is 8.5X11. The brochure must include a minimum of 4 graphics, a custom logo, and appropriate styling. Make sure there is a company name, address, phone number, etc... somewhere in the brochure. Although any font family may be used for headers (make sure they are changed to a graphic), use standard font(s) only for the body. The body text size should be between 10pt to 12pt. This is a full-color brochure. It may be a 2 or 3 column brochure. All text must flow. When it is complete, export it as a PDF file – File>Export>PDF>Small Size File. The PDF file is what you will eMail to me. See sample.
